0981 663 0397 • johnmichaelbanzuela15@gmail.com • Sto. Domingo, Albay

ABOUT ME

IT professional with hands-on experience in technical support, banking API operations, system troubleshooting, database management, and transaction investigation. Experienced in Linux, SQL, API testing, UAT/production support, and backend system workflows.

EXPERIENCE

IT Technical Support Specialist

Rural Bank of Guinobatan, Inc. | 2025-Present

- Provide technical support and troubleshooting for banking systems, APIs, and partner integrations across UAT and production.
- Investigate transaction and API issues using Linux, MobaXterm, Bash and system logs.
- Perform database management, transaction analysis, and data validation using SQL, MySQL/MariaDB, DBeaver, and SQLyog.
- Conduct API testing using Postman, including request/response payloads, authentication, status codes, and API responses.
- Assist with API connectivity, callbacks, credentials, mTLS, VPN access, and partner integration concerns.
- Gain hands-on exposure to backend code and application logic while coordinating with development and technical teams.

Tools: Linux • Bash • MobaXterm • DBeaver • SQLyog • MySQL/MariaDB • Postman • OpenVPN GUI • REST APIs • SQL • mTLS

Front Desk Support and System Developer

Bureau of Fire Protection, Region 5, Legazpi City Fire Station | 2024-2025

- Assisted in front desk operations and provided administrative support.
- Supported website updates and basic system development tasks.
- Helped streamline digital workflows and improve day-to-day operations.

Capstone Lead Developer

Computer Arts and Technological College Inc. | 2024-2025

- Led the development and technical implementation of the capstone system.
- Developed web-based features using PHP, MySQL, HTML, CSS, and JavaScript, including database integration.
- Coordinated technical requirements, documentation, testing, and project delivery.

Tools: PHP • MySQL • HTML • CSS • JavaScript • Git/GitHub • Web Development
